

Checking for User Account Status in AD

Step-1: Log into AdExplorer and connect to: DCRWAZWEU3.globalfme.fmeone.com
User: globalfme\yourFID

The screenshot shows a 'Connect to Active Directory' dialog box. It has a title bar with a yellow folder icon and a close button. The main area contains two radio buttons. The first is selected and is labeled 'Enter a name for an Active Directory database to which you want to connect. If you previously saved a connection, you do not need to enter a database name.' Below this are three text fields: 'Connect to:' with the value 'DCRWAZWEU3.globalfme.fmeone.com', 'User:' with the value 'globalfme\ym8253x', and 'Password:' with a masked password of 12 dots. The second radio button is labeled 'Enter the path of a previous snapshot to load.' and has a 'Path:' text field with a browse button ('...'). Below these fields is a section titled 'If you want to save this connection for future use, select Save this connection, and then enter a name for the saved connection.' It contains a checked checkbox labeled 'Save this connection' and a 'Name:' text field with the value 'Murali'. At the bottom are 'OK' and 'Cancel' buttons.

Step-2: Click on "Search"

Step-3: Choose attribute as per requirement.

For example: Choose Attribute "SAMAccountname" type the FID or firstname.lastname or EmployeeID of user.

For example: Chossed Attribute "sn" type the surname of user.

Search Container

Search for objects with the following attributes:

Class: -- Common classes --
