#	Action	Screenshot
1	Open the required link: - To add a document and make it visible to the end user in quick service customer portal, use the link under Knowledge base for customer. - To add a document and make it available for FMC internal team, use the link under Knowledge base for FMC internal.	
2	Click on add symbol on top right corner. Different templates are available.	
3	Select the document template as per the requirement and click create.	
4	Edit document will open and you will be able add the content.	

5	• For Customer purpose: Click on label icon and add the label i.e, gpdm-polarion • For FMC internal: The is no need to add the label since it is for internal use.	
6	Once the content is added, Click save to save the document.
