

Jira Administration Activities

Activity- 1: Creating a group in Quick service

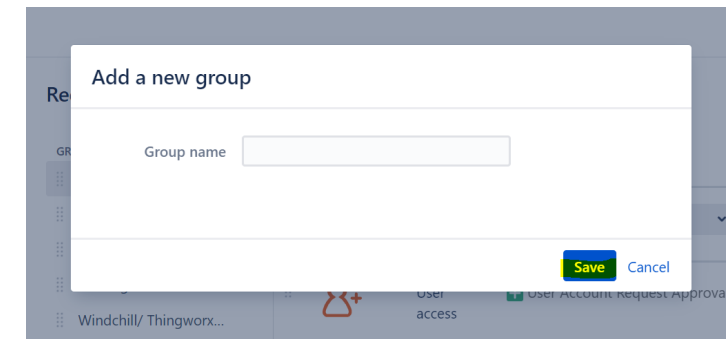

Step-1: Click add group.

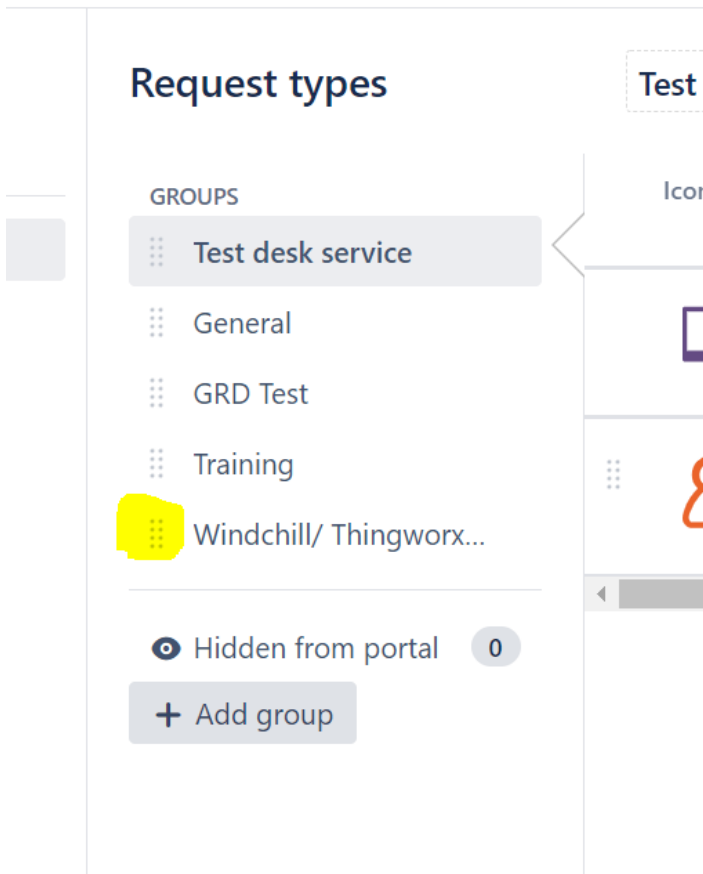

Step-2: Enter the name of the group you want to create.

Step-3: Click on save and the group will be created.

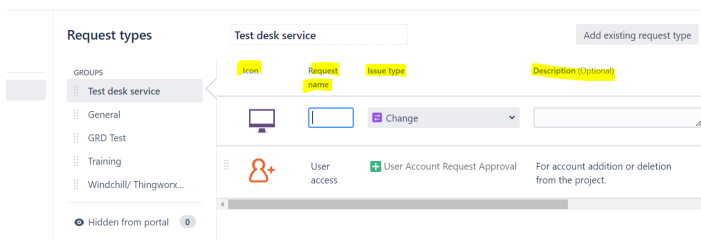

Step-4: You can left click and hold on the dots appears beside the name of the group and set its position

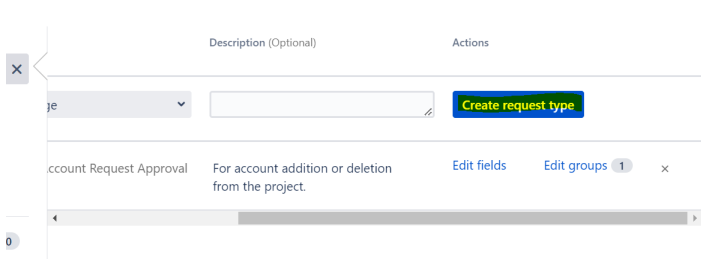

Activity- 2: Creating a request in Quick service

Step-1: Fill the icon, request type, issue type, description of the request fields.

Step-2: Click create request type to create a new request.

Step-3: Once the request is created click on edit fields to open the request.

Step-4: Click on add field to add the required fields to the request.

Step-5: Select the required and click on apply to add the fields to the request.

Step-6: Add instructions in the Help and instruction field. Refer this link for the [formatting](#).

Step-7: If you want to hide a field from the user, click on hide and select a preset value, because when a field is to be hided you need to set a preset value. That field will be filled directly once the ticket is created by the user.

Component/s	No	Hide Remove
Attachment	No	Hide Remove
Approvers	No	Hide Remove

Generic Free Text 2 No

Set a preset value to hide this field

This will be used when the request form is submitted.

Priority Medium [?](#)

[Set](#) [Cancel](#)

Step-8: You can click on remove to remove the fields and that field will go back to Add fields section.

Generic Free Text 1	No	Hide Remove
Generic Free Text 2	No	Hide Remove

Step-9: Click on view this request form to preview the request.
