

How to create Global Admin Account on production

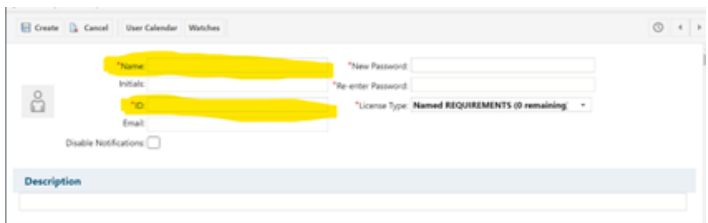

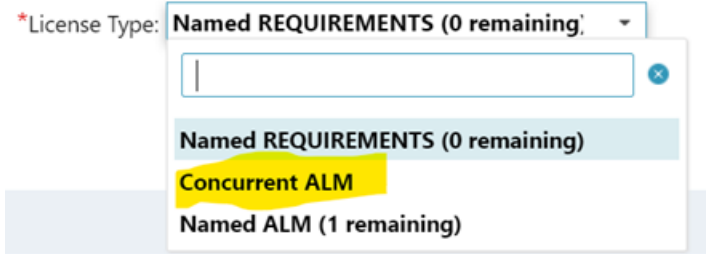

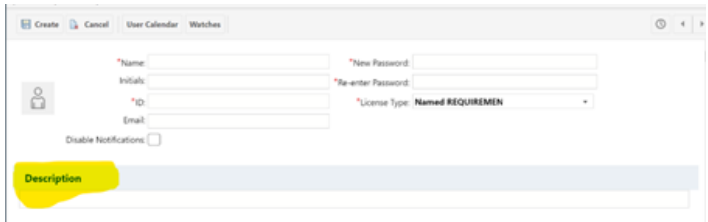

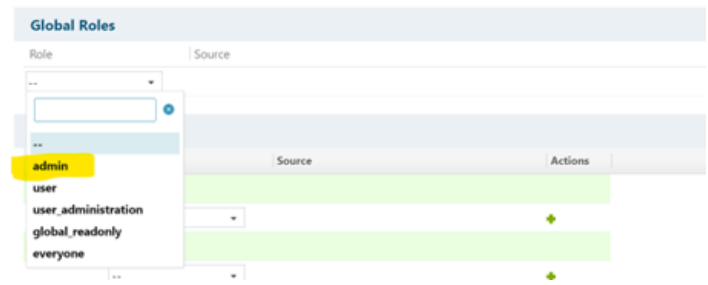

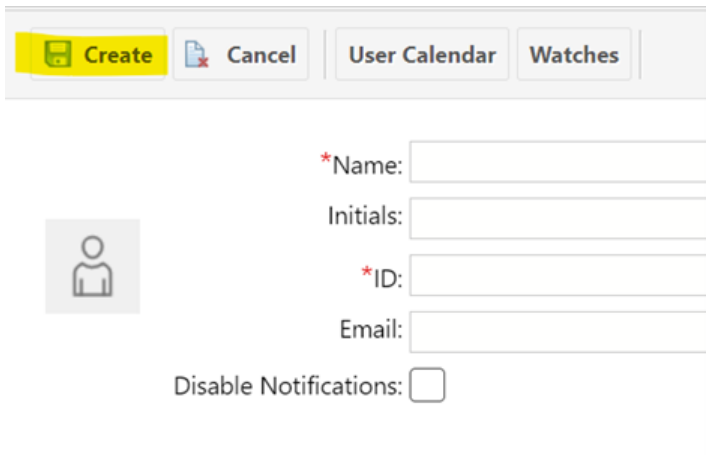

Step	Action	Screenshot
1	Login to Polarion Production with an admin account. Link: PROD	
2	Go to administration on repository level.	

3 Go to user management and then to users.

4 Click on "create new user".

5	Fill Name and ID. Name format: [Name(admin)] ID format: [admin_FID]	
6	License type should be Concurrent ALM.	
7	Create a new password using https://my.norton.com/extspa/passwordmanager?path=pwd-gen and fill "new password".	
8	Fill the description with Qservice ticket link raised by the user.	
9	Provide Admin role in the Global roles section.	
10	Once after filling all the details click on Create and the global admin account get created.	

11. Share the Id and new password with the user on Qservice ticket raised by user and confirm the accessibility.

12. After accessibility confirmation, ask user to change the temporary password given by us, as per their convenient.

Steps to reset password:

- > Login to Polarion.
- > Go to my account.
- > Click edit.
- > Enter new password.
- > Re-enter new password.
- > Save.
