

How to get Polarion SVN Admin Access

Steps:

	Action	
1	The user raises a "Digital User Account Request". Using the link: Digital UACF .	
2	The user fills the Digital UACF .	
3	In the Description, user needs to provide the below details: Reason for SVN Access: Name: FID: Email:	
4	UACF request should be approved by Renate Floeser / Miklos Spirko.	
5	After the UACF request gets approved, AMS Engineer will raise IT-Schweinfurt request for the requested user to get SVN Access. Link: IT-SW Portal If user present in NA Active Directory Process to be followed by AMS Engineer for NA User If user has account in NA AD, AMS Engineer will raise a request to get user added to Polarion-SVN group for SVN admins. To add user account in Polarion-SVN Group. AO Support engineer will follow the below step: - AMS Engineer will raise a request to AD team using below URL: - Create INC2817009 Incident ServiceNow fill below details - Add description to ticket "Add User <Username >to Polarion-SVN group - Assign a group for services now ticket as (DTI-INF-AD-L3) - Once the user is added to Polarion-SVN group, User will get the access to SVN.	

6	Example of Request: After the link is opened, below options are available and answers to those are highlighted. 1. Um welche Windows Gruppen geht es? / Which Windows groups are we talking about? GG-DE-SCW-R-Admin-Server-Polarion 2. Berechtigungen / Permissions Alle hinzufügen or Add All 3. Für wen sollen Berechtigungen angepasst werden? / For whom should permissions be adjusted? Anfrage für einen anderen Benutzer or Request for another user 4. Kostenstelle / cost center DE01001032 5. Beschreibung / Description As agreed with IT Operations Schweinfurt, please add the following user to groupGG-DE-SCW-R-Admin-Server-Polarion Name:FID: Email: Note: In the IT-Schweinfurt portal Approver is Michael Baunach.	
7	After the request is approved by Michael Baunach, user will be added to the Group “GG-DE-SCW-R-Admin-Server-Polarion”.	
8	Then user will be able to access SVN.
