

How to update distribution list DE_BHO_GPM_ALM group

Step	Action	Screenshot
1	Open the Excel sheet GPDM_ALM_all_users in Fresenius share point. Link: Copy of GPDM_ALM_ALL_USER_NewTenant.xlsx (sharepoint.com)	
2	Login to Polarion production with an Admin account.	
3	Open this link in new tab Link: https://polarion.gpdm.fmcglobal.net/polarion/#/project/PolarionCM/wiki/Administration/UserRoleEmails	
4	Select all Projects EXCEPT Sandbox.	
5	Select PROJECT_ASSIGNABLE role.	

6	Right click on the URL showing "send email to the ??? selected users" and select copy email address.	
7	Paste all the emails in MS Word and separator with line feed. For the line Feed use these steps CTRL+H Find what "," and replace with "^p". And click Replace all.	
8	Replace the list of users in users raw worksheet in Copy of GPDM_ALM_ALL_USER_NewTenant.xlsx (sharepoint.com) with the list that you have copied.	
9	Go to user Filtered in Copy of GPDM_ALM_ALL_USER_NewTenant.xlsx (sharepoint.com) and click on data and click on refresh and remove all duplicates using remove duplicates button.	

10	Go to Users Filtered sheet and select "Users filtered" only the @freseniusmedicalcare.com emails show starting at A6.	
11	We need to exclude blacklist section users from new list, for that use Blacklist filter and select only SEND in the filter and click on apply.	
12	Now, copy all user's emails from column D of Copy of GPDM_ALM_ALL_USER_NewTenant.xlsx (sharepoint.com) to the new Excel and request an update for distribution list.	
13	Additional users from additional user's section should be added to the newly prepared list.	Mandatory
14	For update of distribution list mail globalDTIservicedesk@freseniusmedicalcare.com	

Important Note:

- For every two months we need to update the DL (DE_BHO_GPDM_ALM).
- Once we share new list to support team, they will send back some users who are not available, and it is normal.
