

GTAC Enhancement Request Template

When a request is acknowledged as a Enhancement Request by Siemens, a detailed form has to be shared with GTAC highlighting the urgency of the topic so that it is prioritize by Siemens.

Describe the use-case you are missing:

<Detailed description of the problems faced by users (including the number of users impacted) highlighting why this ER is needed on priority>

Do you currently have a workaround?

<Include workaround if available>

Do you have a proposal how the use case shall be exposed in the product?

<Share how the features implementing the use case may look like from your perspective>

What is the level of productivity gained (\$) from such an enhancement?

<Share how this will benefit the end users in day to day business>

NOTE: (avoid vague answers such as *high*, ideally how much man-days or \$ you save per week)

Customer Priority:

a. Number of users impacted:

b. How frequently you run into this situation:
