

Process to follow for GPDM Clean Restart

1. **Admin activity** to be created for GPDM Production restart
2. Secure **Approval** of Admin Activity
3. Set up **Banner** in Windchill GPDM Node1 & Node2 (If required)
4. Send out a **Global communication** to the recipient below:

windchill.IT@fmc-na.com;

FMC.AMS.Support@freseniusmedicalcare.com;

FMC.IE.support@accenture.com;

ML-NOC@freseniusmedicalcare.com;

CORA@fmc-na.com;

gauri.sarpotdar@freseniusmedicalcare.com;

michael.baunach@freseniusmedicalcare.com;

ritesh.nagori1@freseniusmedicalcare.com;

5. **Connect to Master, Node1 & Node2** from AWS Session Manager
6. Check **Active User Count** from Server Status page
7. Stop services in Node2: ***ant -f \${WT_HOME}/wtSafeArea/build/build.xml stop.service.all clean.cache.all***
8. Stop services in Node1: ***ant -f \${WT_HOME}/wtSafeArea/build/build.xml stop.service.all clean.cache.all***

Note: Once scripts in both the nodes are executed, please run **Checkps** in both the nodes to verify that all the processes (MS/SM) are actually stopped

9. Stop services in Master: ***ant -f \${WT_HOME}/wtSafeArea/build/build.xml stop.service.all clean.cache.all***

Note: Once scripts in both the nodes are executed, please run **Checkps** in Master to verify that all the processes (MS/SM) are actually stopped

10. Start services in Master: ***ant -f \${WT_HOME}/wtSafeArea/build/build.xml start.service.all***

11. Clear the banner: **bannerclear** from Node1 and Node2 (If required)

Note: Once scripts in Master node are executed, please run **Checkps** and validate the same from logs in Master node to verify that all the processes (MS/SM) are started

12. Start services in Node1: ***ant -f \${WT_HOME}/wtSafeArea/build/build.xml start.service.all***

13. Start services in Node2: ***ant -f \${WT_HOME}/wtSafeArea/build/build.xml start.service.all***

Note: Once scripts in Node1 and Node2 are executed, please run **Checkps** and verify that all the processes (MS/SM) are started

14. Validate **Server Status** page and look at all the numbers

15. Validate the **Vault**, (Main Vault => DefaultVault) make sure all are valid

16. Start all the **Workers machines**

17. Send out a **Global communication** to the recipient below:

windchill.IT@fmc-na.com;

FMC.AMS.Support@freseniusmedicalcare.com;

FMC.IE.support@accenture.com;

ML-NOC@freseniusmedicalcare.com;

CORA@fmc-na.com;

gauri.sarpotdar@freseniusmedicalcare.com;

michael.baunach@freseniusmedicalcare.com;

ritesh.nagori1@freseniusmedicalcare.com;

18. Update the **Admin Activity** and mark it **Resolved**
